

METHOD AND SYSTEM FOR PROVIDING SECURE ACCESS TO PRIVATE NETWORKS

ABSTRACT OF THE DISCLOSURE

5 Improved approaches for providing secure access to resources
maintained on private networks are disclosed. The secure access can be
provided through a public network using a standard network browser.
Multiple remote users are able to gain restricted and controlled access to at
least portions of a private network through a common access point. The
10 solution provided by the invention is not only easily set up and managed, but
also able to support many remote users in a cost-effective manner.
